- **Fraud Management:** Actimize, IFM-X
- **Project & Stakeholder Management:** Sprint Planning, Stakeholder Communication, Cross-Functional Collaboration, Vendor Management
- **Software & Productivity Tools:** MS Office Suite, Word, PowerPoint
- **Operating Systems:** Windows, Linux, macOS

EDUCATION

Masters in Management Information Systems | University of Illinois, Springfield, IL

May 2024

Certification

Generative AI for Business Analysts

EXPERIENCE

Discover Financial Services, IL

Dec 2025 –Current

Business Analyst

- Gathered and documented functional and non-functional requirements for 10+ enterprise Salesforce applications, ensuring alignment between business objectives and technical implementation within Agile environments.
- Led payment processing issue investigations by coordinating with internal stakeholders and 50+ external payment partners, reducing repeat escalations by approximately 15%.
- Managed end-to-end remediation activities for card processing and POS certification initiatives, ensuring compliance with technical specifications and operational standards.
- Supported SAP GTS implementation activities and trade compliance processes, reducing operational compliance risks by nearly 25%.
- Conducted UAT validation and trade process testing, improving system reliability and reducing data integrity issues by 20%.
- Collaborated with DevOps and engineering teams to streamline deployment workflows, improving release efficiency and reducing system downtime.
- Leveraged AI-driven automation solutions to improve transaction processing accuracy and reduce system-related failures by approximately 20%.
- Developed operational analytics and reporting dashboards to monitor partner incidents, compliance gaps, and remediation progress for leadership visibility.
- Maintained strong partner and stakeholder relationships while supporting day-to-day operational activities, risk mitigation, and issue resolution.

Cardinal Health, NJ

Apr 2024 – Nov 2025

Business Analyst

- Facilitated requirements gathering sessions with business stakeholders and converted business needs into actionable user stories and acceptance criteria using Agile methodologies.
- Successfully delivered four Salesforce applications on schedule while reducing project delays by 25% through effective sprint planning and stakeholder coordination.
- Coordinated cross-functional teams consisting of developers, QA teams, and business users, accelerating overall project delivery timelines by 15%.
- Supported SAP GTS implementation cutover and hypercare activities, resolving critical production issues within 24–48 hours to minimize business disruption.

- Designed and executed UAT test scripts in Jira, improving release quality and reducing testing cycles by approximately 20%.
- Developed SQL queries for data validation, data mapping, and testing activities, reducing data-related production issues by 30%.
- Implemented a SharePoint-based document management solution that improved collaboration efficiency by 20% and reduced document retrieval time.
- Built interactive Tableau and Power BI dashboards to improve KPI visibility and support executive-level business decision-making.
- Managed vendor relationships, negotiated service agreements, and achieved operational cost savings of approximately 10–15%.

Experion Technologies, India

Apr 2020 – Dec 2022

Business Analyst

- Collaborated with cross-functional teams to gather business requirements and develop KPI dashboards using Google BigQuery and Power BI, reducing average claims processing time by 15%.
- Analyzed operational workflows and identified automation opportunities that improved business process efficiency by approximately 25%.
- Developed trade compliance reporting dashboards and data visualization solutions to improve reporting accuracy and operational monitoring.
- Implemented risk assessment tools within underwriting workflows, improving risk score accuracy by 5% and reducing fraudulent claims by 2%.
- Supported client engagement activities by resolving business and technical issues promptly, improving customer satisfaction and retention rates.
- Conducted user training sessions for newly implemented software solutions and automation tools, increasing user adoption rates by 25%.
- Built Power BI dashboards for executive leadership, enabling faster strategic decision-making and identifying annual cost-saving opportunities exceeding \$50K.
